EDUCATION

Institute of Technology, Nirma University, Ahmedabad, Gujarat, India Sept. 2022 – May 2026
Bachelor of Technology in Computer Science with Minor in Adaptive AI **CGPA: 9.07**

PROFESSIONAL EXPERIENCE

Blink Analytics Dec 2025 – Present
LLM Engineering Intern Ahmedabad, Gujarat, India

- Improved candidate assessment quality for an interviewing platform by optimizing prompts for context-aware question generation, resume screening, and candidate evaluation using SFT and RLHF techniques.
- Developed automated evaluation frameworks to benchmark question quality and interview performance across multiple parameters, accelerating prompt iteration cycles and reducing manual validation effort.
- Enhanced candidate engagement by building voice-agent workflows for interview reminders and post-interview feedback collection, streamlining recruitment operations, and improving the candidate experience.

Intech Creative Services May 2025 – Jul 2025
AI/ML Intern Ahmedabad, Gujarat, India

- Built a resume matching system that automated candidate ranking against job descriptions with 95% semantic accuracy, processing 500+ resumes and significantly reducing manual screening effort.
- Automated candidate outreach, screening, and interview scheduling workflows by integrating conversational AI models from ElevenLabs and n8n, reducing manual recruitment coordination by 60%.
- Engineered a Flask backend integrated with Google APIs using OAuth 2.0 and PostgreSQL, enabling automated chat-space creation and bot deployment for internal collaboration.

SKILLS

Programming Languages: Python, C++, SQL

Frameworks & Libraries: PyTorch, TensorFlow, Scikit-learn, OpenCV, Pandas, NumPy, Matplotlib, FastAPI, Flask

Databases: MySQL, PostgreSQL, SQLite

Automation Tools: Git, GitHub, n8n, Docker, MLflow

Core Knowledge: LLM Evaluation, Prompt Engineering, Machine Learning, Deep Learning, Retrieval-Augmented Generation (RAG), Natural Language Processing, Computer Vision, Data Analytics & Visualization

PROJECTS

Ahmedabad Metro 2025
Python, Flask, React, Leaflet, Pandas, Botpress, Unicorn [🐙](#) — [🔗](#)

- Built a full-stack smart transit platform with Flask APIs and a React frontend, supporting route finding, nearby station detection, real-time schedules, facility listings, fare calculation, downloadable maps, and route guides.
- Implemented an interactive map interface using Leaflet and developed a multilingual chatbot using Botpress with three language support for user query handling.

CM Outreach Dashboard 2025
Tools: Next.js, TypeScript, React, Leaflet, Tailwind CSS [🐙](#) — [🔗](#)

- Built an interactive analytics platform that visualizes the Chief Minister's outreach across Gujarat through a responsive UI with deep-linked filters for date, district, and event type.
- Integrated Leaflet-based geospatial visualization with marker clustering and Recharts-powered analytics to summarize event distribution, district activity, and monthly trends with data-driven insights for policy evaluation.

English-Gujarati Machine Translation using Transformer 2025
Python, PyTorch, Streamlit, HuggingFace Transformers [🐙](#) — [🔗](#)

- Developed a Transformer-based Neural Machine Translation system for English-Gujarati and deployed it as a Streamlit web app, enabling real-time and accessible bilingual translation.
- Engineered an encoder-decoder architecture with multi-head self-attention, cross-attention and positional encoding, trained on a parallel corpus subset, evaluated using BLEU/CHRF metrics, and published the model on Hugging Face for easy access.
