Education

Institute of Technology, Nirma University Sept. 2022 – May 2026
Bachelor of Technology in Computer Science with Minor in Adaptive AI; ***CGPA: 9.07*** *Ahmedabad, Gujarat, India*

Experience

Serin AI Jul 2026 – Present
Founding Engineer *Ahmedabad, Gujarat, India*
- Designed and shipped AI-driven analytics and monitoring features end-to-end across Next.js and FastAPI, translating business requirements into scalable full-stack solutions.
- Built and maintained REST APIs, responsive React/TypeScript interfaces, and PostgreSQL workflows to power custom dashboards and internal monitoring tools.
- Debugged backend workflows, data-processing pipelines, and frontend bottlenecks in fast-paced iterative cycles, improving platform reliability and delivery speed.

Serin AI Dec 2025 – Jun 2026
LLM Engineering Intern *Ahmedabad, Gujarat, India*
- Integrated LLM APIs and Generative AI workflows into enterprise assessment systems using prompt engineering (CoT, RLHF), improving output consistency by 40%.
- Engineered an automated Python LLM evaluation framework to benchmark prompts across multiple dimensions, reducing manual validation effort by 80%.
- Rapidly prototyped and deployed voice-agent integrations and automated data-collection pipelines, streamlining internal operations and user workflows.

Intech Creative Services May 2025 – Jul 2025
AI/ML Intern *Ahmedabad, Gujarat, India*
- Built an end-to-end AI resume matching micro-app using embeddings and semantic vector search, achieving 95% accuracy and reducing manual screening time.
- Developed RESTful backend services using Python (Flask), PostgreSQL, and Google APIs (OAuth 2.0) to deploy secure AI chat interfaces and internal tools.
- Integrated conversational AI and ML pipelines into business workflows to automate outreach and scheduling, owning delivery from rapid prototyping to deployment.

Skills

Programming Languages: Python, TypeScript, JavaScript, SQL, C++

Web Development: FastAPI, Flask, React.js, Next.js, REST APIs, Tailwind CSS, Streamlit

Data Science: LangChain, LLM APIs, Hugging Face, Prompt Engineering, RAG, Embeddings, Vector Search, PyTorch, Pandas, NumPy

Databases & Tools: PostgreSQL, MySQL, SQLite, Git, GitHub, Docker, Vercel, PostHog, MLflow, n8n

Core Competencies: LLM Evaluation, Object-Oriented Programming (OOP), Database Management Systems, Retrieval-Augmented Generation (RAG), Natural Language Processing, Data Analytics & Visualization

Projects

Ahmedabad Metro
Python, FastAPI, React, LangChain, Leaflet, Pandas, Gunicorn —
- Engineered an end-to-end transit web app using FastAPI (REST APIs) and React, featuring interactive station search, route guidance, and automated fare calculation.
- Integrated an AI-native multilingual chat assistant using LangChain and RAG workflows for context-aware user support, paired with Leaflet geospatial mapping.

CM Outreach Dashboard
Next.js, TypeScript, React, Recharts, Leaflet, Tailwind CSS —
- Designed and shipped a responsive custom analytics dashboard using Next.js and TypeScript to process and visualize large-scale outreach datasets across Gujarat.
- Implemented interactive data visualizations using Recharts and Leaflet with marker clustering and deep-linked filters, deployed on Vercel for real-time trend analysis.

English-Gujarati Machine Translation using Transformer
Python, PyTorch, Hugging Face Transformers, Streamlit —
- Developed and deployed a Neural Machine Translation micro-app for English-to-Gujarati translation, rapidly prototyping a real-time web interface via Streamlit.
- Trained a custom encoder-decoder Transformer architecture, benchmarked output quality using BLEU/CHRF metrics, and published model artifacts to Hugging Face.
